

Data Sheet Steel-frame tank made from Alcryn®

Example

Manufactured from PES/Alcryn® with a minimum tensile strength of 2500 N/5 cm, material weight approx. 1300 g/m², suitable for a temperature range of -30°C to +100°C, chemical resistant.

Support frame made of stainless steel 1" tubing. Including holdall. Optional Storz hose coupling with protective hood.

Alternative "A": with 2-part horizontal frame to reduce packing dimensions

Holdall with 2 lifting loops

Art.-No.	Capacity [l]	Frame dimensions [m] (LxBxH)	Dimensions packed [cm] approx. (LxØ)	Weight without coupling [kg]
141002	3.000	1,7 x 1,7 x 0,96	180 x 30	43
141003	5.000	1,9 x 1,9 x 1,08	200 x 45	56
141003A	5.000	1,9 x 1,9 x 1,08	120 x 45	56
